

MARE GTC 900/900 2VD

Our MARE GTC 900-2DV is a full-featured rescue boat of the highest quality. When it comes to arrive acute or be present early at several types of contingency, our GTC 900-2DV series is the perfect choice.

VESSEL DETAILS	GTC 900	GTC 900 2VD
Hull material	Aluminium	Aluminium
Length over all	8,75 m	8,75 m
Length of hull	7,70 m	7,70 m
Breadth max	3,30 m	3,30 m
Weight with equipment	3110 kg	3870 kg
Engine power	340 hp	2 X 165 - 250
Speed approx.	30-32 knots	30-40 knots

The MARE GTC 900 2VD is designed, built, and equipped to comply with the strength and safety in Solas 74, with revised chapter III, amendment 1983, N.M.D. and D.O.T. The boat is built for offshore use in extreme weather conditions with carrying capacity in excess of 2 tons and tested to carry 10 persons in addition to crew. The boat design provides sustained high speeds in adverse conditions and precise manoeuvrability at all speeds ahead, astern and stationary. The design provides recovery facilities for divers and personnel in the water while manoeuvrability maintains without risk or injury. To afford shelter and seating for a crew of three.

The hull is built of marine grade aluminium plates. (Plates EN-AW 5083 H116/ Profiles EN-AW 6082 T6) Gunwale and chine extrusion special made for fastening the flotation collar cover to the hull. The hull is installed with four spray lines, two at each side of the hull. From bow to the transom the working deck is of heat-treated non-skid Marine Grade Aluminium. The deck area is self drained through tubes in the transom plate. The hull is extended beyond the transom to prevent sprays of water entering the boat A total of 3000 litres. of expanded Polyurethane foam in the compartments under deck will keep the boat floating under all conditions. The hole deck is working deck is welded to the hull.

MAIN DIMENSIONS & PERFORMANCE		
Length over all, w/waterjet approx.	8,75	Meter
Length of hull	7,70	Meter
Breadth max	3,30	Meter
Breadth of hull	2,50	Meter
Depth of hull at max	0,60	Meter
Weight dry	3110	Kg
Speed max., approximately	30-32	Knots
Cruising range	250	Naut.miles
Davit load with 10 persons	4100	Kg
Lifting point above keel	2,45	Meter
